

TECNOTHANE® ETU & MPT

Energy saving potential for solid cast elastomers

- **TECNOTHANE® ETU Easy-To-Use casting of MDI elastomers.** Potential to:
 - ▶ Extend the dimension of parts to be moulded
 - ▶ Help reduce the energy consumption in production process
- **Potential to recycle PU with our filler dosing unit into Castech™ machines**
 - ▶ Give second life to your PU waste into a tech composite material
 - ▶ Transform your PU system into a composite by adding fibers or fillers
- **SUPRASEC® 2511 solution developed for offshore protection parts**
- **TECNOTHANE® MPT6075 for tough elastomer solution**
 - ▶ MDI polyether solution available in extended ShD hardness range
 - ▶ Easy to process & developed for large parts production
